Mayor Reviews Council's Road Program

Advocates Purchase of Trees For Down Town Area.

This is just a little survey of the council's actions for the Spring and summer of this year. The council is always alert and are trying to make this year's improvements just a little more and even better than the improvements that were put in force previously. In other words, the town council of the town of Coleman are progressive and are moving with the times, and are doing all they can to make Coleman a better place to live in by spending the ratepayers' money for permanent improvements, something that has not to be gone over again before the year is out. True we have not much money to work with, but we have tried to spend just enough money on improvements so as we would not have to borrow money from the banks.

The mill rate has not been raised, and we have just spent the money that we have earned, and this would be a good lesson for many towns much larger than Coleman to learn. If any city, town or village is going to get anywhere in the future they are going to have to live within their means. In other words, they cannot go on and spend that which they have not got. When the well goes dry you cannot get any more water, and when there is no money to spend you should not borrow, but cut your cost according to the cloth you have.

This year we have put down approximately one mile of hard-surface street, the width being 20 feet. This comprises a section of two or more blocks on

Rod And Gun Club Prize Winners

The Rod and Gun club made another of their scheduled fishing trips on Saturday when eleven members travelled to the Prospect at the North Forks. The prize winners were R. Penman, heaviest grayling; J. Wilson, heaviest basket of speckled trout; R. Jenkins, heaviest mixed basket; J. Morrison, heaviest speckle; Joe Jenkins, heaviest bull trout.

The next trip is scheduled for Saturday, August 28.

The homes of Frank Serak, of West Coleman and Joe Gordollop of East Coleman were broken into during the weekend. Serak lost several articles, while Gordollop lost a watch. In both homes two tickets on the Irish sweepstakes were stolen.

Second street on the main highway of the provincial government, but which is in the town limits; four blocks from the bridge entering West Coleman to the bottom of McGillivray hill; two or more blocks on First street from the Motor Inn to the end of the town limits; from McDonald's corner on Second street to the miners' union hospital; Central avenue from Canadian Bank of Commerce to the tennis courts; Paulson avenue from the International office to the corner of Sentinel Motors and Empire hotel; Mayfair avenue from the hospital to the Motordrome garage.

Apart from the hard-surfaced road for motor traffic, the council is laying a six feet wide sidewalk on the north side of Sixth street from the east end to the west. Starting alongside Mr. Tiffin's residence on Sixth street they are building the same size walk to come out at what everyone in Coleman calls Jack Hopkins' corner. They will cross the street, which is already hard-surfaced, and come past the Catholic school, past Mr. Jack Nash's residence then cross the street again and the pedestrian is on the walk that goes down past the school.

The council intends from time to time to build more of these walks, where the people can walk much more at ease; besides this will help to educate the children to keep off the streets where they will be safe from motor traffic.

Just think what could be done if the Council could collect the arrears of taxes. At December 31, 1936, arrears were \$10,673.00, if we had that money at our disposal we could hard surface all streets and lay sidewalks to practically every home in Coleman, along with the rest of the taxes that comes in 1938. It is surprising what a large amount of improvements can be made when plans are made in advance and such a thing as guess work does not enter into the picture at all. Your Council of the last few years have studied conditions, as they are trying to give the ratepayers value for every hard earned dollar they pay in taxes.

What could be looked into by the ratepayers and the council is the purchase of approximately 500 trees for next Spring, then in about four or five years the downtown section would look a real beauty spot. It is surprising what can be accomplished with a little cooperation. Let us all pull together for a beautiful Coleman.

The Town Council,
George Pattinson, Mayor.

Hoyle's Appeal Upheld by Board

School Board's Representatives Overlook Motion of June 16 in Presenting Case

A special meeting of the school board was held in the board room Monday, Aug. 16. Present were Chairman Fraser, and Trustees Greenhalgh and Fleming. Absent, Trustees Hope and Sharp.

A letter re "Coleman School Board vs. David Hoyle" was read and discussed, the contents of the letter received from Judge A. M. McDonald, a member of the Board of Reference,

is as follows:

The Honourable William Aberhart, Minister of Education, Edmonton, Alberta.

Dear Sirs—

re Coleman S.D. No. 1216 vs.

David Hoyle

From the evidence before me I must hold that the Notice to terminate the contract between the School Board of the above named School District and Mr. Hoyle was without doubt unauthorized as it was mailed to and received by Mr. Hoyle on the 16th day of June last and the School Board meeting at which it was agreed upon to cancel the agreement was not held until the 18th of June, the day following the mailing of the notice.

On the merits it would appear from the facts before me that the School Board were not acting in the best interests of the School when they took the steps they did to cancel this contract. About the only complaint they put forward was that Mr. Hoyle neglected to return to certain pupils small sums of money he held belonging to them. Early in June 1935, 16 pupils gave him \$1.30 each for the purchase of certain books but owing to the fact that some of the books could not be obtained, only half that amount was expended and they were entitled back 65¢ each. Some of them received their money but others, for some reason or another, did not receive it as soon as they possibly should have. Mr. Hoyle swore he had notified them to call for their money by placing a notice on the Notice Board, and was always ready to refund what money he had not paid out on their behalf. In some cases the delay may have been caused by the pupils leaving school at the end of June of that year. This and some mistake about the examination fees of two pupils, amounting altogether to \$0.90, which was later adjusted, were about the only complaints of any consequence put forward by the School Board as their reason for having him removed.

Mr. Hoyle is the Principal of the Coleman High and Public Schools. There are 19 teachers on the staff of these schools and an enrolment of about 650 pupils.

Mr. Hoyle has been engaged as Principal for ten years and from the facts before me he apparently has given general satisfaction, as apart from the complaints I have referred to, there does not appear to be any other reason for his dismissal. There

is no record of his services to the Council.

The works and property committee was ordered to inspect the present coal bin and chute at Central school for the purpose of making improvements to facilitate the janitor's work during the winter.

Meeting adjourned.

Local News

Mr. Harry Wilton-Clark, manager of Mohawk Mines, is a business visitor at Spokane.

The Misses Annie Lopichuk and Jennie Anderson, of Camrose, stopped off on their return from Vancouver to visit the former's brother, Mike Lopichuk.

Miss Edith Gordon, of the White Birch staff, returned last Friday from a month's vacation spent at East End, Sask., visiting her parents.

Miss Helen Webster, Harold Webster and Jack Houghton, accompanied by "Bushy" Williams and sister, Kay, of Pincher Creek, have left on an auto tour over Logan Pass and into the States.

Two men, one local man and one transient from Montreal, were sentenced to thirty days at police court here on Monday, Aug. 9, and sent to Lethbridge jail. An assault case was heard at the local police court on Monday, the defendant being warned to keep the peace.

Coleman Play Fernie for Mutt Cup Here Sunday

The first of the cup games for Crow's League trophies will be played at the local grounds here on Sunday when Fernie and Coleman meet in a "sudden death" game for the Mutt cup. These games were scheduled to have been played several weeks ago, but difficulties arose which have only recently been overcome.

Michel have withdrawn from the league, Coleman and Fernie will play at the latter city for either the Grand Central or Cranbrook trophies. Next Sunday, a meeting will be held here of the Crow officials to decide the matter.

BUILD SIDEWALK FROM FOI RTN TO SIXTH STREET

The hill lying alongside the residence of Tiffin and Wilson will be graded this week in preparation for laying a hard-surfaced sidewalk which will extend from Moore's residence on Fourth Street to R. Tiffin's residence on Sixth Street. Another hard-surfaced sidewalk will be built running alongside the Catholic school building to the Nash residence. This will finish the hard-surfacing program for the year.

Eyzacker's Bird Wins Calgary Race

The third young birds' race was flown from Calgary on Sunday, Aug. 15, a distance of 101 miles. Keen interest was taken in this race due to the exceptionally fine performance of the Pekeese dog, given by a dog-famer in Calgary. Second prize was given to the value of \$200 donated by the Motordrome. Race results were:

(Signed) A. M. McDONALD, A Member of the Board of Reference, Calgary, Alberta.

August 9th, 1937.

In discussing the first paragraph of the letter, it was stated by the board that on June 16 a meeting was held at which the following motion was passed: "Moved by Trustees Fraser and Greenhalgh that the teachers receive 30 days clear notice to terminate contracts now in existence." Letters containing notice of termination of contracts were sent to all teachers on June 17.

On June 18 another meeting was held by the school board where it was noted that a postscript had been omitted from the motion re terminating contracts, and a new motion was moved and carried, it reading: "Moved by Trustee Fraser, seconded by Trustee Greenhalgh, that all teacher contracts be cancelled and teachers notified that their services be not required after the 20th of July, but a postscript stating that they could apply for duty on Sept. 1st."

It was stated that Messrs. Hope and Barnes, who had presented the case for the school board before the Board of Reference, had overlooked the motion of June 16 in the minute books and as a result overlooked that the postscript of the July 18 motion was in direct reference to the motion of June 16. It was further stated that Mr. Hope was in the chair the evenings of June 16 and 18 and was aware that these motions had been passed. The matter will be discussed at the next fully attended meeting. There is no appeal against the Board of Reference's decision and Mr. Hope will consequently report for duty on Sept. 1st.

An order for five standard and two noisy typewriters was authorized by A. Harper, of Lethbridge, agent for Remington Rand Typewriter Co.

The works and property committee was ordered to inspect the present coal bin and chute at Central school for the purpose of making improvements to facilitate the janitor's work during the winter.

Meeting adjourned.

Canadian Press despatch reports Harvey Murphy being arrested at Peterborough, Ont., on a charge of publishing false news. Murphy is now president of the Ontario Federation of Unemployed.

POSS BOULTON TRAINS FOR COMMERCIAL PILOT'S LICENSE

Poss Boulton is one young man who is going to train himself in readiness for Canada's fast growing aviation system. Foss left Edmonton early in July and has since resided in Vancouver where he has bided his time in order to secure entrance into Vancouver's only aviation school. The proprietor, who is also the instructor, comes from the same town in Wales as Mr. and Mrs. Harry Boulton.

Foss will start at the bottom, first as an apprentice to the mechanics, and work his way up to his final goal, a commercial pilot's license. The course will take three years.

Mr. and Mrs. H. C. Pearson were week-end visitors at Coleman recently.—Kimberley Courier.

Co-Eds Trim Acme-Ettes at Softball, Sunday

Edna Morris Hits Two Homers in Second Game

"Murderers' row" on the Co-Ed softball team was much too strong for Lethbridge Acme-Ettes as the local girls swept to an easy 14-3 win in the first of a two game series, played at the ball park on Sunday. Kubica only allowed her opponents to score in the third and sixth innings, being given almost flawless support by her teammates who played brilliantly. Co-Eds hit the offerings of the Lethbridge pitcher with abandon and soon piled up an insurmountable lead.

In the second game both teams were erratic at the start and numerous errors were made on both sides. Acme-Ettes took an early lead in the first two innings. Co-Eds came from behind in the sixth inning and increased their lead from there on to coast home with a 14-10 decision.

Kostelnik, of the Acme-Ettes hit a home run in the second inning, the first of the series. Edna Morris, not to be outdone, hit a homer for Co-Eds, and repeated in the ninth with her second homer to lead her team to their second win. Kubica and Matichovich formed the battery for Co-Eds in both games. Ferguson and Perchak formed the battery in the first game, and Kostelnik and Dereck in the second game for the Acme-Ettes.

Hallowell Gets Vice-Presidency

Editor of Coleman Journal Chosen For C.W.N.A. Post

HALIFAX, Aug. 16.—Eastern Canada today was a social laboratory in which the co-operative movement was being given a scientific test, Professor Malcolm McLellan, of St. Francis Xavier University, Antigonish, N.S., told the closing session of the Canadian Weekly Newspapers Association's convention here Saturday.

The press will play an important part as the social culture of the people was raised, he said. Increased emphasis was being placed on a wider spirit of co-operation throughout the world and in it the co-operative movement would play an important part.

George W. James, of Bowmanville, Ont., Statesman was elected president of the Association as the three-day convention closed.

Frank J. Burns, of Kentville, N.S., Advertiser; and H. T. Hallowell, of the Coleman, Alta., Journal, were named first and second vice-presidents; with C. V. Charters, of the Brampton, Ont., Conservator, elected managing director and secretary.

Directors included: R. J. McDougall, Penticton, B.C., Herald; F. P. Galbraith, Red Deer, Alta., Advocate; W. T. Murphy, Viscount, Sask., Sun; T. A. Love, Grand Forks, B.C., Gazette; S. J. Dorman, Alameda, Calif., Dispatch; S. N. Wynn, Yorkton, Sask., Enterprise.

The "Golden Idea" contest, for the best idea in relation to business in the field, was won by Thomas Hallowell, of the Coleman, Alta., Journal; with a scheme to meet competition of mimeographed advertising sheets.

Advertisements Are Read . . .

WATCH in your home how The Journal—or any other newspaper—is read. Possibly the main headlines on the front page are first scanned; but it is a pretty safe thing to say that women readers will turn very early to the advertisements of local firms which advertise fashion items, food prices, and other offerings related intimately to current needs and desires.

Moisture Begets Moisture

While not a new principle to scientists, the general public in the prairie provinces—the business man in the city and the farmer in the country—are beginning to awaken to a realization that moisture begets moisture and there is also a dawning popular conception of the truism that plant welfare is dependent upon moisture in the atmosphere as well as moisture in the soil.

In other words it is seeping into the public consciousness that crops, whether cereal, vegetable or any other type cannot flourish and yield fruits without drawing sustenance from the air as well as from the soil—a horticultural and agricultural axiom that is often either forgotten or overlooked.

Let the moisture in the atmosphere disappear almost to the vanishing point as it has done for a number of years recently and profitable yields of grain, forage crops and vegetables disappear with it.

And since moisture begets moisture, there can be no moisture in the atmosphere without reservoirs of water to serve as a source of supply. That is at least one of the principal reasons why seasons of drought tend to deepen in intensity as the years go by, and that is why residents of the prairie provinces have reason to be apprehensive of the future, unless measures are taken to prevent a recurrent drought cycle.

The condition is aptly diagnosed by H. H. Cleugh of Vancouver in a recent contribution to the daily press, describing the situation in Saskatchewan this year, a situation equally applicable to the sister provinces in bygone years and likely to be repeated in the future, when he says:

"In Cuba or Jamaica the heat is intense, yet nothing shrivels or turns brown. Why? Because the air is filled with humidity rising off a warm sea. Heat is life, providing the proper amount of humidity is present. Ninety degrees in Saskatchewan is not at all disastrous, if the air carried humidity, but when the humidity is nil, disaster and plant death is the consequence."

And what is the remedy for this condition of aridity—the natural and scientific corollary to the problem? Is it not the provision of bodies of water of sufficient dimensions and in sufficient numbers strategically located to ensure evaporation of life-giving water into the atmosphere to provide the air-borne moisture essential to the plant life on which the people of the west depend for sustenance, and to aid precipitation?

This also is answered by Mr. Cleugh in graphic language in his statement that "evaporation is the most efficient way in which humidity is formed and moves quickly from shallow lakes and ponds. The shallow slough (rapidly warmed by hot summer suns) is what makes moisture."

There could be no more potent argument than this in support of a request for governmental aid in irrigation projects which would contemplate the damming up of hitherto waste water to form reservoirs of extensive area and preferably of shallow depth. Such reservoirs would serve the double purpose of furnishing water direct to growing crops through the medium of irrigation channels and of supplying moisture to the atmosphere by evaporation from the surface of these bodies.

"Cover your prairie with water as it was in 1882 to 1885," says Mr. Cleugh. "Dams all small streams, ponds, sloughs and lakes; fill them with water, get it how you will but get it; you must have it. A pipe line will do that for you and irrigate 60,000 acres a week and create humidity for 60,000 more."

The loss to the people of the prairie provinces occasioned by lack of moisture in the past few years has been terrible. The total bill for the value of crops which might have matured had moisture been available, plus the expenditure for direct relief necessitated because of its lack, runs into hundreds of millions of dollars.

But these two items do not cover the entire cost of drought. Consideration must also be given to the loss occasioned by dust storms, the resultant phenomenon of the drought era and of wasteful cultivation methods. One authority recently estimated that when one inch of top soil is blown away, a section of land sustains a loss of \$192,000 in nitrogen and phosphorus. Thus, wind erosion jeopardizes crop in future years, even when there may be a plentiful supply of moisture both in the soil and in the atmosphere.

When such losses are weighed in the balance against the cost of construction of irrigation projects, whether they be a few schemes of great magnitude or a multiplicity of small ones, the policy of withholding expenditure of large sums of money for such purposes is economically indefensible, wherever and to what extent such projects are an engineering feasibility.

The Selfish Drivers

Are Cause Of 75 Per Cent. Of All Traffic Accidents

Joseph H. King, superintendent of the automobile and casualty branch of the Canadian Underwriters' Association, says that "just plain everyday selfishness" is responsible for 75 per cent. of our traffic accidents.

There isn't a doubt of it. People endanger their own lives and those of others by making mad motor dashes, cutting in and out of long lines of traffic, "beating" stop lights, going over crowded intersections at crazy rates of speed and otherwise conducting themselves in selfish and foolish fashion. The only wonder is that there are not twice as many accidents as actually occur.—*Windsor Daily Star*.

Construct Mine-Sweepers

Two Vessels To Be Built In British Columbia

Hon. Ian Mackenzie, Defence Minister, announced that he had been officially informed from Ottawa of the construction of four mine-sweepers for the Royal Canadian Navy had been approved by the Government. Mr. Mackenzie said the vessels would cost about \$352,000 each. Two of the ships will be built in British Columbia—one by Burrard Drydock Company, Limited, in North Vancouver, and the other by Yarrows Limited, at Victoria. The other two will be constructed in Eastern Canada, one at Collingwood, Ont., and the other at Quebec City.

A Good Test

A writer in the Windsor Daily Star says "few adult Canadians can repeat offhand more than the first verse of 'God Save the King.' Even the first verse would stump a goodly number. To prove it ask a few of your acquaintances to repeat the last line of the first stanza and note whether they give it "our king" or "the king."

Havre, at the south of the Seine, is a central channel port of many shipping lines that serve all parts of the world.

In Scotland's border counties, bridal couples still observe an old custom of drinking hot ale after the ceremony.

British Sloop At Churchill

History Made When Vessel Arrives 155 Years After Fort Surrendered To French Admiral

On an August day, 1782, a French fleet under the famous Admiral of Wale, built on the shore of Hudson Bay to defend the mouth of the Churchill river, and the garrison surrendered without a shot being fired.

On a recent Monday, 155 years later, the next warship appeared before the old fortifications. It was His Majesty's Sloop Scarborough. She steamed slowly under its ancient guns and landed in the modern harbor of Churchill within the shadow of the towering white elevator.

The ships in the harbor dipped their flags as the sloop went by. The Louis Dreyfus, freighter loading wheat, dipped its French tricolor. The R.M.S. Nascope, preparing for its long cruise into the northern Arctic, and the Hudson's Bay Company's other boats joined in the welcome.

Fort Prince of Wales took 30 years to build. Some of its walls were 32 feet thick and it is 300 feet square. It was intended as a great stone fortress to protect the interests of the Hudson's Bay Company trading to Hudson Bay.

The French fleet surprised it in 1782 with scarcely any defenders in the fort and after its surrender the victors rolled the guns from their placements. They sought to tear down the walls but the work was too heavy for them and they left them standing and sailed away.

The great muzzle-loaders lay rusting in the weeds for 150 years when the historic site board took the fort over and replaced many of the cannon. The work was completed this summer.

The Scarborough was bathed in sunshine as she came out of Hudson Bay into the harbor. Its commander, Captain Baxter, was greeted by Port Commander W. R. Meadows and later the captains of the other ships paid courtesy visits. The sloop remained at Churchill about a week.

Empire Drama Festival

Advocated By Earl Of Bessborough To Promote Good Feeling

An empire drama festival to promote international culture, is advocated by the Earl of Bessborough, who is governor-general of Canada from 1931 to 1933, played a prominent part in fostering the Little Theatre movement in the Dominion.

"It is generally agreed there is no better way in these days of promoting good feeling amongst peoples, than by encouraging cultural relations," he said. "Just as the drama has proved a vital element in the integration of the nine provinces of Canada, could it not also be used similarly to help to draw the units of the empire still closer?"

Lord Bessborough pays high tribute to Canada generally for the achievement of bringing the stage back to life, despite discouraging obstacles.

If enthusiasts for the drama in Vancouver could travel 3,000 miles to take part in a festival at Ottawa, it would be possible to organize an empire drama festival in some other place, in which companies from the Dominions and other units of the empire would take part, he said.

Geoffrey Whitworth, director of the British Drama League, which coordinates the activities of more than 2,500 amateur societies, has discussed the idea with the Earl of Bessborough and given his assurance of co-operation.

"What we have in mind is a festival to which Canada, Australia, New Zealand and South Africa, would each send a company from the selected company, representing Britain," Whitworth said.

To Make Armaments

South Africa Plans To Be Independent As Possible For War Supplies

A scheme to make South Africa as independent as possible for armament supplies in times of war is under investigation by the Government. At the moment it is confined to experimental work in the manufacturing of bombs for the Air Force, Hand-grenades, gas helmets and gas masks may be made by private armaments firms. Work is believed hurried on with the completion of the Government's small arms factory at Pretoria.

Neglected Fields

Long before America came into the pages of history King Solomon knew that the fields let in the evil of Nature as well as the decay of man: "I went by the field of the sixtieth, and by the vineyard of the man void of understanding; and lo, it was all grown over with thorns, and nettles covered the face thereof, and the stone wall thereof was broken down."

A white leghorn hen at Ladysmith, South Africa, has laid an egg 3½ inches long, 2½ inches wide, and weighing five ounces, nearly three times that of an ordinary egg.

West Africa is the home of the world's smallest antelope. It stands only a little more than 12 inches high at the shoulders.

Sudden Death For Transients

Frequent Accidents Are Tragic Signs Of Social Conditions

On a recent morning, before the dawn, eight cars of an eastbound freight train hurtled off the track in a remote part of the rail route between northern Ontario and carried seven transients to sudden death in the crush of piled-up cars and freight. Another man died of injuries. Six others were injured. Thirteen transients escaped unharmed and helped the train crew in rescue work.

This is a tragic sign of the times. It is by no means unusual, except in the number of victims involved. Recently accidents have taken the lives of several other transients. The frequency of such reports is evidence of the number of men, footloose and derelict, travelling around the country by freight trains.

In Regina recently a young man was killed attempting to clamber on board an outgoing freight train. His fate was ghastly. The news from time to time multiplies such incidents.

The accident that brought death to eight men in northern Ontario revealed that 25 transients at least were riding on the train involved. There is no doubt that the attraction to travelling eastward for some of them is the news of bountiful crops in Ontario and maize made a certain little light, much like unto the light of a little candle, which the Spaniards call the Cero Santo. That light continued aboard our ship about three hours, flying from mast to mast."

Sailors have called St. Elmo's Fire, "God's burning fingers" and when they see it they regard it as a good omen for the voyage. St. Elmo is a corruption of St. Arasmus, the patron saint of seamen in the Mediterranean.—*St. Thomas Times-Journal*.

Atmospheric Electricity

Called St. Elmo's Fire By Sailors And Is Considered Lucky

The investigators into the Hindenburg disaster found that it was due to an electric spark which came in contact with gas discharged from the ship preparatory to mooring. Investigators of the investigation have come to the conclusion that the spark was none other than what is known as "St. Elmo's Fire".

This is a phenomenon which has been known to seafaring people for hundreds of years. Mariners have noticed tiny glowing flames which dance the tips of masts and spars, particularly during thunder weather. (Thunder was heard in the distance when the Hindenburg was landing at New Jersey.) It is, in fact, atmospheric electricity which takes the form of a pale phosphorescent light. As far back as 1598, in a book called "Hakuyu's Voyages", the author wrote:

"I do remember that in the great and boisterous storm of this foul weather there came upon the top of our maine yard and maine mast a certaine little light, much like unto the light of a little candle, which the Spaniards call the Cero Santo. That light continued aboard our ship about three hours, flying from mast to mast."

Sailors have called St. Elmo's Fire, "God's burning fingers" and when they see it they regard it as a good omen for the voyage. St. Elmo is a corruption of St. Arasmus, the patron saint of seamen in the Mediterranean.—*St. Thomas Times-Journal*.

The Drowsy Driver

Is Usually One Who Does Not Get Sufficient Sleep

Whenever the driver of an automobile falls asleep at the wheel long enough to cause an accident—and that is not very long—he will be lucky if he ever wakes up. A study of driver-asleep accidents in a dozen states reveals that one out of 12 kills is caused by a driver who has slept the whole time and that one-third of the time it is the driver himself. A surprising fact developed by the National Safety Council is that nearly half of the drivers who fall asleep had been driving for less than 20 hours. A third of them, however, had been without sleep for 16 to 20 hours, so that it is evident that lack of proper amounts of sleep rather than grueling grinds at the wheel is responsible for a large number of these mishaps. The drowsy driver returning home from a late party is the most common victim of the highway nap, and he usually drops into a slumber and oblivion at about two o'clock in the morning.—*Science Digest*.

SELECTED RECIPES

SWEET CUCUMBER PICKLE

2 qts. ripe cucumbers
1 teaspoon baking soda
2 tablespoons powdered alum
1 tablespoon root ginger
1 qt. vinegar
2 lbs. white sugar
3 cups Crown Brand Corn Syrup
1 cup whole cloves
½ cup stick cinnamon (tied in bag)

Method: Peel and seed the cucumbers; cut into 3-inch strips. Cover with cold water; add soda; let stand overnight. Drain and cover with cold water in which the alum has been dissolved; boil ten minutes; drain. Cover with cold water; add ginger and boil fifteen minutes; drain. Measure water and discard (there is usually about ¼ quart). Measure as much vinegar as you have water and to each add 2 lbs. white sugar and 3 cups Crown Brand Corn Syrup, the cloves and cinnamon. Pour over cucumbers and boil until clear. Seal in sterile jars. Makes six pints.

Canned Apple Juice

Product To Be Tested This Fall For Popularity

Canned apple juice, a product which has been the subject of experiments at the Okanagan Valley Dominion Experimental Station at Summerland, is to be tried on commercially by a leading wholesaler in Vancouver. It is understood that a trial pack of a thousand cases will be canned this fall and offered for sale to test out its popularity with the buying public.

A Queer Viewpoint

The four big railway companies in Great Britain have about \$30,000 towels taken each year, while spoons, electric bulb and other things are constantly stolen. An astonishing number of people still exist who seem to think that other people's property belongs to them.

A sponge will absorb more ice water than it will hot water.

Polar bears have an exceptionally acute sense of smell.

Salt Mine Disappearing

Was Worked By Pueblo Indians In Fifth Century

Waters of Lake Mead, slowly pinching out behind Boulder Dam, are wiping out an industry which thrived as far back as 500 A.D.

The old St. Thomas salt mine, with its mountain of salt 300 feet high, said by scientists to have been worked by Pueblo Indians as early as the start of the fifth century, is beginning to disappear. Eaten away by the man-made lake, residents of Las Vegas, Nevada, are wondering if the great pile of salt will contaminate the waters to any extent.

Several years ago the ancient salt mine attracted scientists from afar when evidences were discovered that man, in the dawn of history, had engaged in industry there. Digging tools, fashioned from rocks tied together with animal skins, were dug up. They were said to archaeologists, that the mine was the base of one of the principal workings of the Pueblo Indians who inhabited the territory from about 500 A.D. until about 1200 A.D.

The more modern history of the mine started in our own early western days when the first of the Bonelli family, emigrating from Switzerland, settled in the St. Thomas section and became influential in its development. There the Bonellis, according to old timers, organized the Virgin River Salt Company and operated the mine and a salt mill for many years. Finally, the Virgin River company died and the mine was worked intermittently by various residents of the area. During the past few years thousands of tons of salt have been taken out.

The old mine lies at the base of the salt mountain, but already the rising waters of the lake have covered the road over which millions of tons have been hauled through 44 centuries, and to-day the ancient workings are isolated, approachable only by boat. Each day the waters rise; and soon all trace of the industry of 500 A.D. will be buried under the waters of progress of 1937.

A Large Landowner

Hundred Thousand Acres In Poland Belongs To One Man

The Potocki family, a member of which the Duke of Kent, visited at his estate at Lancut, Southern Poland, are legendary for their wealth and hospitality (says a London Evening News reporter).

They are among the greatest landowners on earth. I have heard it said that it takes Count Alfred, who was host to the Duke, nearly three weeks to travel round his estates, upon a fairly leisurely inspection that entails a caravan of cooks and servants. His stables contain some of the finest horses in Europe.

Herr von Ribentrop spent a weekend a couple of years ago at the estate of Count Alfred, between Cracow and Lwow, where this Count owns 100,000 acres!

A hundred thousand acres is rather larger than England's smallest county, Rutland; quite a piece for one man to own.

Employment For Indians

Grey Owl, well-known Prince Albert naturalist, advocated a new attitude toward Indians. He said, "Teach the Indian as an Indian and don't try to change him. My suggestion would be that the Indians be allowed to work conserving wild life. There's nothing left to hunt, so they can't live hunting and trapping as they used to, but they could conserve what animal life there is left," he said.

A colored couple sent out the following invitation to their friends and acquaintances.

"You are invited to the marriage of Mr. Henry _____ and Miss Josephine _____ at the house of the bride's mother. All who cannot come may send."

Georgia has 6,464 miles of railways within her boundaries.

BLACKHEADS

Get two ounces of peroxide powder from your druggist. Sprinkle on a hot cloth and rub the face gently. Every blackhead will be dissolved. The one salt, sugar and simple soap to remove blackheads. Have a Hollyhock complexion.

Prime Minister Names Five Prominent Men For Royal Commission

Ottawa.—Five distinguished Canadians will constitute the royal commission to investigate the economic and financial basis of confederation in the light of social and economic developments in the last 70 years.

Prime Minister Mackenzie King announced the commissioners would be:

Hon. Newton F. Rowell, chief justice of Ontario, Toronto, chairman;

Hon. Thibaudau Rincret, justice of the supreme court of Canada, Ottawa;

John W. Dafoe, president and editor-in-chief of the Winnipeg Free Press, Winnipeg;

R. A. MacKay, professor of government at Dalhousie University, Halifax;

H. F. Angus, professor of economics at the University of British Columbia, Vancouver.

Work of the commission will begin at an early date with an organization meeting. The terms of reference are of a sweeping character and are designed to enable the commissioners to make their first thoroughgoing review of Canada's constitution and governmental machinery, with particular reference to financial aspects since the Dominion came into existence through the passage of the British North America Act 70 years ago.

In announcing the commission's appointment Mr. King said:

"In accordance with the announcement which I made in the House of Commons at the last session, the government has appointed a royal commission on Dominion-provincial relations."

"As indicated in the terms of the reference, the central purpose of the commission is to provide for a re-examination of the economic and financial basis of confederation and of the distribution of legislative powers in the light of the economic and social developments of the last 70 years. In the work of the commission, special attention will be given to financial aspects of the problems involved."

The commission will meet at an early date for the purpose of organization.

"The government has been fortunate in securing for this all-important undertaking the services of five commissioners whose impartiality, breadth of background, and variety of experience will be immediately and generally recognized."

The government is confident that the commission's presentation of the facts and report will be of great value to the Dominion and the provinces, and to the people of Canada as a whole, in facilitating an equitable and effective solution of the problems created for our country by changing needs and conditions."

Living Costs Up

Ottawa.—A Dominion bureau of statistics report said moderate advances in prices of a few of the more important foods, partially offset by seasonal productions in coal and coke prices, resulted in an increase in the general cost of living for Canada from \$2.7 in June to \$3.0 in July. The comparative figure for July, 1936, was \$0.4.

Donation For The Blind

London.—Lord Nuffield, industrialist-philanthropist, donated £3,000 (\$3,715.35) to aid in caring for the blind. This new donation brought the total of his philanthropic gifts to more than £8,000,000.

Rising Marine Rates May Mean Lean Year For Vancouver Port

Vancouver.—Rising marine freight rates on the Pacific ocean will probably mean a lean year for the wheat business at British Columbia ports, Vancouver grain brokers and elevators forecast.

These sources, declining to be quoted by name, said that until a few days ago Pacific coast ports had expected to handle more than 50 per cent. of this season's Alberta crop, estimated at 80,000,000 bushels, one-half Canada's entire 1937 production.

But rising freight rates, they said, are rapidly changing the outlook to the disadvantage of the Pacific.

Hunting Restrictions

Regulations Imposed To Meet Serious Depletion Of Wild Fowl
Ottawa.—The department of mines and resources announced migratory bird regulations for the 1937 hunting season, extending the restrictive principles of the 1936 regulations imposed to meet serious depletion of waterfowl through over-shooting and through drought on prairie nesting grounds.

The regulations, which include bag limits for ducks and geese and seasons dates in the prairie provinces, follow the recent announcement from Washington of continuance in 1937 of "very strict regulations" in effect in the United States in 1935 and 1936 under the migratory birds treaty.

In all provinces, bag limit for ducks is placed at 12 a day. Bag limit for the season is 150 in the maritime provinces, Ontario and Quebec, but is 100 in the Prairie provinces and 125 in British Columbia.

The captain declared the attack took place off Kelibia, 50 miles northeast of here, with the vessel he identified as the Saetta, flying "a war flag."

He said a second Italian destroyer not identified, was present during the attack.

The captain reported that seven minutes after the first torpedo struck, two other missiles were fired into the Campeador's centre, causing her to catch fire.

The vessel, loaded with 9,500 tons of benzine, sank soon after the captain ordered her abandoned.

Americans In Danger

U.S. Consul-General Making Efforts To Evacuate Foreigners

In China

Shanghai.—Militarized Chinese police barricaded Kiangwan village, just north of Shanghai, against the possibility of attack from the reinforced Japanese garrison and refused to allow the American community or other foreigners to depart.

The United States consul-general was making frantic efforts to contact mayor O. K. Yu of greater Shanghai to gain consent for evacuation of the stranded Americans but the meeting will be no success.

The Chinese move was to be merely a Chinese defensive move against the increasing influx of Japanese armed forces and military supplies and was in no way dictated at the Americans. The sudden Chinese manoeuvre, however, placed them squarely in the danger zone of possible hostilities.

Grain Marketing Commission

Members Expect To Sail To Canada Before The End Of The Month

London.—The Canadian royal commission on grain marketing, headed by Mr. Justice W. F. A. Turgeon, of Regina, has concluded its European sittings. Hearings will be resumed at Winnipeg, Sept. 22.

Members of the commission returned to England after brief visits to Antwerp, Brussels, Paris and Rotterdam. Dr. Justice Turgeon expects to sail for Canada before the end of the month. J. L. Ralston, C.K., counsel for the commission, will leave next week.

Executions In Russia

Spies And Wreckers Executed Said To Total 320

Moscow.—Execution of 72 alleged far-eastern railroad wreckers accused of conniving with the Japanese secret service was reported by the Irkutsk newspaper, "East Siberia Pravda."

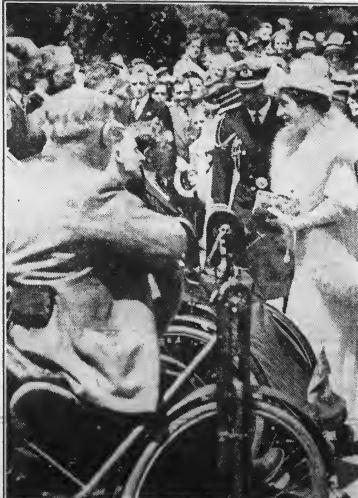

The executions followed others but the group was one of the largest to be executed in Soviet Russia's far-flung Siberian purge.

The total of known executions in this far eastern campaign to root out spies and wreckers is 320.

Spies And Wreckers Executed Said To Total 320

Prices reported paid in Manitoba points are from \$7 to \$8 for No. 1 hay, \$6 to \$7 for No. 2 and \$5 to \$6 for No. 3.

KING AND QUEEN GREET VETS

Their Majesties talking to "Old Contemptibles" of the Great War at Cardiff during their Coronation tour of Wales.

MAXIM LITVINOFF

Stalin is preparing for another "purge" in Soviet Russia, according to the Paris correspondent, J. M. Litvinoff, Commissar of Foreign Affairs, is to be one of the victims. He is reported to be facing arrest along with a number of high army and navy officials.

In the prairie provinces, bag limit for geese is five a day but the seasonal limit is placed at 50 in Manitoba, 20 in Saskatchewan and 25 in Alberta.

In British Columbia, bag limit for geese (including Black-neck) is five a day, 50 for the season.

Prohibition of baiting and live decoys continues in all provinces.

Following are open season dates: Saskatchewan: North of Township 60 open season for ducks, geese and Wilson's snipe will be Sept. 1 to Oct. 30; south of township 61, open season for ducks, geese and Wilson's snipe will be Sept. 20 to Nov. 30.

Alberta: North of the Athabasca and Clearwater rivers open season for ducks, geese and Wilson's snipe will be from noon on Sept. 15 to and including Nov. 13.

To Resume Zep Service

Predict Revival Of Passenger Schedule By Next Year

New York.—Revival next year of Germany's trans-Atlantic Zeppelin passenger service was predicted by Captain Max Pruss, commander of the airship Hindenburg, which crashed at Lakehurst, N.J., three months ago with loss of 36 lives.

Captain Pruss said the new Zeppelins, now under construction, would be buoyed by non-inflammable helium gas.

Critically burned in the Hindenburg disaster, the commander soon will leave his hospital bed here to return to Germany.

Manitoba Hay

Expect Good Market In Saskatchewan This Year

Winnipeg.—With a Saskatchewan hay market estimate of at least \$2,500,000 available to Manitoba farm needs, despite Saskatchewan drought areas, Manitoba department of agriculture officials estimated officially this province's 1937 tonnage of wild hay would be from 1,000,000 to 1,250,000 tons and other hay about 500,000 tons.

Prices reported paid in Manitoba points are from \$7 to \$8 for No. 1 hay, \$6 to \$7 for No. 2 and \$5 to \$6 for No. 3.

Glaciers Melt In Norway

Twice Houses Swept Away In Resulting Tidal Wave

Oslo, Norway.—Norwegian glaciers melted in a recent hot spell.

A huge section of the base of Hardanger glacier disintegrated under the intense heat and fell off into Demme Lake.

The splash created a tidal wave 160 feet high which washed away 12 houses, destroyed nearly crops and filled fields with large boulders. No casualties were reported, however.

Son Of Inventor Dead

Winnipeg, Del.—William L. Edison, 58, oldest son of the inventor, the late Thomas A. Edison, is dead.

Edison held many patents on basic principles he discovered during several years of experimenting. Among his best known discoveries were those which adopted the single radio tube to multiple uses.

Senator Dandurand

Will Head Delegation At League Of Nations

Want Bank Staffs Names

Social Credit Board Wants Information By August 15

Edmonton.—First step to prepare for licensing of Alberta bankers and employees under legislation passed at the recent session of the house has been taken by the Social Credit board, it was learned here.

A "confidence letter," signed by Floyd M. Baker, secretary to the board and received by some bank managers, asks for names and addresses of all members of the staff.

This information, according to Mr. Baker's letter, is desired on or before Aug. 13.

The letter also asks for the name and address of the bank manager who is referred to as "your good self."

"The information is not here," said one bank manager. "Any such request will be referred to our superintendents, who have all staff information."

It was reported here that some bank superintendents in Calgary have received a request for the lists required by the board.

Mussolini Doctrine

Intens Preparation Of Italian People For A Military Life

Catania, Sicily.—Premier Mussolini told 100,000 Sicilians that the cornerstone of our doctrine and our spirit is an ever more intense preparation of the Italian people for military life.

Speaking crowds heard Il Duce declare on the eve of annual war games in Sicily.

"History shows us that when a people does not want to bear its own arms it is forced to bear the arms of someone else."

History also shows, Mussolini shouted, that the Italian people are not warlike, but have no other alternative except misery and slavery."

Jewish Exodus To Palestine

Zurich, Switzerland.—A proposal to settle 200,000 Jews in Palestine within the next three years, involving an investment of about \$175,000,000, was laid before world Zionists congress by Eliezer Kaplan, treasurer of the Zionist executive committee.

Ottawa.—Senator Raoul Dandurand and Canada's veteran international statesman, will head the Canadian delegation at the coming meeting of the assembly of the League of Nations. Prime Minister Mackenzie King announced.

Other delegates will be Hon. J. L. Illey, minister of national revenue, and Hon. Vincent Massey, Canadian high commissioner in London. Dr. W. A. Riddell, Canada's permanent officer at the League of Nations, will be an alternate delegate.

Senator Dandurand is minister without portfolio in the King government and government leader in the senate. A former president of the assembly of the league, he has represented Canada at many international gatherings and is thoroughly familiar with the work of the league.

One of the younger members of the cabinet, Dr. Illey will be making his first trip to Geneva as an official Canadian delegate. Mr. Massey attended last year's assembly as a member of the Canadian delegation and has participated in several international conferences.

The league assembly will meet Sept. 13.

Selection of the royal commission on Dominion-provincial relations has been under consideration by the government for some time. Decision to appoint the commission was announced by Mr. King during the past session of parliament.

Object of the assembly is to determine whether and how existing financial relations between the different governmental units of Canada may be improved.

Drought Resistant Wheat

Plan To Develop New Varieties For Semi-Arid Districts

Ottawa.—Dr. E. S. Archibald, director of experimental farms, said extensive studies were being made to develop a variety of wheat which will grow under abnormal conditions of low precipitation.

Dr. Archibald told the National Association of Local Government Officers of Great Britain, visiting here, that he had just returned from several weeks of study in the Saskatchewan drought areas and that he was "hopeful" certain varieties of wheat now developed might be adaptable to the semi-arid areas.

Shanghai.—Hostilities broke out in the northeastern quarter of Shanghai's international settlement as Japanese blue-jackets on patrol and Chinese plainclothes men exchanged fire.

The conflict developed in a situation made acute by the arrival of Japanese reinforcements and the moving in of detachments of Chinese regular troops.

Other parts of the settlement were heavily garrisoned.

British forces patrolled a three-mile front while the eight-strong band of Chinese regulars augmented by a Russian company occupied a dangerous sector adjacent to the Chinese within Chapel, Chinese section of the city. United States marines were to the right of the British.

British troops, 950 strong, were mobilized with United States, French and other international forces to protect the foreign communities of China's largest city, including 9,000 Britons.

Foreign officials feared their nations might be in even greater danger than in 1932, for Chinese leaders indicated they were unwilling to respect the neutrality of the foreign-controlled sections of Shanghai—the international settlement and the French concession—as they did in 1932.

The present Shanghai phase of the undeclared Chinese-Japanese war full of tension since the killing of two Japanese naval men and a Chinese gendarme, became acute when it was established that strong forces of Chinese regular troops, under direction of the central government, were moving into the Shanghai area.

While the battle for possession of Nankow pass—key to continuance of Japan's newly-won control of the Peking-Tientsin region—went on in the mountainous northwest, contingents of the Chinese 29th army were reported to have defeated Japanese forces a few miles outside Tientsin.

Troops of the central government poured into the Shanghai zone by every railroad and highway in an effort to assert China's mastery over the area which Japanese planes devastated in an undeclared war in 1932.

The sudden ingress of Chinese troops blocked off virtually the entire country around Shanghai and isolated hundreds of foreign families in the danger zone.

NOTES ON OUR TRAVELS

Montreal, Tuesday, August 10th, 1937

Since writing our epistle of last week to The Journal, we have spent most of one day in Toronto, which since we were there last has increased considerably in population, and to the business area of which has been added some very fine buildings. Outstanding of course, is the palatial Royal York hotel, the largest of the fine string of hotels owned by the Canadian Pacific Railway. We enjoyed the pleasure and comforts of this vast hostelry during our brief stay, and it could house quite comfortably the population of a town of 2,000 people. It has almost 1200 rooms complete in every detail for the comfort of the guests. Combined with the fine new Union station, it gives the visitor an impression of dignified importance as he arrives in the city.

A reminder of Coleman as we strolled around the business area was the fine head office building of The Canadian Bank of Commerce, reported to be the tallest in the British Empire, though possibly the Sun Life building in Montreal may vie with it in this respect. The Commerce building in Toronto towers to such a height that standing on the opposite side of the street, one has to crane his neck to the limit to view the topmost story. You could poke Coleman branch into its doorway, and possibly still have some room to get into the building.

On the way up to Toronto from Windsor, where our trip from Port Arthur by the S. S. Noronic of Canada Steamship Lines ended (and which proved most enjoyable) we spent a day at Chatham, in Kent County, visiting relatives of the editor's wife, and a most refreshing rain fell which made the country appear as a paradise in contrast to the arid areas of the vast Saskatchewan plains. Around Chatham the country is well settled, and the farm which we visited had buildings on it one hundred years old. The city is the centre of a splendid district, and has a very smart and clean appearance, while on Saturdays there is a large open-air market to which the produce of the countryside is brought for sale.

Referring back to the trip down Lake Superior and Huron, which takes two days, over fifty per cent. of the passengers were tourists from various parts of the United States, many making the round trip from Detroit to Duluth, which takes just a week from the time of starting till they return to Detroit or Windsor. At our first meal in the dining saloon on this fine ship, the "Noronic," we made the acquaintance of a lady from Edmonton, also on her way to Halifax to attend an Anglican Synod and W. A. meeting. Consequently we had much in common to talk over, especially on the trend of political events in the Alberta capital, which are causing very adverse editorial comment in eastern newspapers.

Leaving Toronto on Sunday afternoon, Aug. 8, on the S. S. Kingston, of the Canada Steamship Lines, an uneventful trip was made to Rochester, N.Y., which we reached shortly before 10 p.m., and after a brief stop we retired, to awake early next morning to find the boat alongside the wharf at Kingston, which most people associate with the Royal Military College and the penitentiary. It was so foggy in the early morning (6 a.m.) that we could see little of the city, but after proceeding along this interesting waterway, we were in the midst of the thousand islands, where fine homes erected by wealthy people as summer headquarters are noticed both on the Canadian and American shore lines. Some of these places are really castles, one place costing over a million dollars. Quite a number are built on their own individual islands, so there is no fear of being disturbed by neighbors' cocktail parties or week-end celebrations.

Arriving at Prescott, we change from the Kingston to the S. S. Rapides Prince, which is so constructed that it can navigate the rapids which are quite frequent between here and Montreal. It is a fine boat with plenty of deck space, and there is a mild thrill of excitement as the boat goes down the rapids, with the water roaring on all sides and white capped waves adding to the turbulence of the scene. Only skilful navigating can successfully "shoot the rapids," which hold intense interest for all on board.

Just as it was getting dark, we arrived at Lachine, Que., whence motor busses quickly convey the passengers to various hotels in Montreal, while the ever present tourist guide gives a discourse on the points of interest in around the city. And after concluding his little talk, he reminds the passengers to be careful to not hit their heads on the roof of the bus as they leave, as the wood is hard, while some wag adds in an undertone, "And so are some heads!"

And so we arrive in the biggest city in Canada, where the French language is quite freely spoken. After a long day on the boat, not many are anxious to go out and see night life in Montreal, and despite the humid heat of these eastern cities, to which dwellers from the mountains are unaccustomed, we quickly sink into the realms of repose.

People will never be right in their economics until they are right in their hearts.

"School Bound?"

...Asks JANE DEE

GOING away to school this Fall---to College---to Normal---or to train for a number of other things? It's time to be planning your wardrobe. You'll be surprised how the correct clothes will add to your enjoyment and give you confidence when meeting new people.

It is not necessary to spend lavishly to be smart. A little careful studying of what you actually need, and knowing how to minimize on accessories will help the budget greatly.

Why not write to me and tell me what your plans are for the Fall? Of course, I can't give me a complete description of yourself---your coloring, height, weight, bust measurements, etc. I will be glad to help solve your problems, so do not hesitate to write.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER IX.—Continued

But if I had got out of the pot, it was the schoolmaster who got into the fire. Nathaniel Carson had succeeded my friend, Michael, as teacher of the Mono school. Young Mr. Carson was a good master and a nifty dresser. In fact, he was quite a lady's man. Sure, he was considerate to every housewife that he could charm out upon her table all the comforts of her cupboard. And in the presence of any young miss who was stepping out, such a soulful light lit up his soft brown eyes that delightful ticklings would quiver down the young thing's being. Not, perhaps, that the schoolmaster was really amatory-minded; nor that the jealous play-boys of Mono, with rustic waggery, were justified in calling him a kisser, which was as appronious an epithet, in those days, as calling a horse a crib-sucker. To be able to impress the ladies favorably was in his mind an element toward worldliness; and young Mr. Carson was chuck full of ambition. To his boy-vagging eye, beautiful things, either on a family table or in a lady's bower, were plain as the nose on a... At the local parties, he was a regular cut-up; and, at the climax of the jollity, nothing delighted him more than to be called upon for a song. The sound of his voice, gamoured the man. He was of that pushful, self-assessive type that is too wise ever to take offence; and, while he hadn't much brains, he was of the sort of conceited climbers who always get along smartly in a raw, young country. Carson was already using the jargon of the law and he afterward went into law and politics. He had a brilliant career until that amatory lady, Angina Pectoris, got her arms around the pudgy bachelor and hugged him to death. Had she ever had a rival in his selfish heart?—Heaven only knows, not old Betty Slater.

Betty Marshall had been one of the bright pupils in his school, and the teacher had pride himself on the rapid progress she was making. The child had been desperately anxious to please, and right at her toes to succeed. She excelled at the first-dressing spellings, and cried in heartbroken vexation if anyone scolded her down. But after the New Year of '37, Elizabeth Ann was now thirteen; and curious humours in her mind marked a physical change in her body. She became listless and indifferent in her studies, took a vixenish pleasure in making snippy and saucy answers. I fear me, Betty was disturbing sadly the discipline of the Mono school. Nathaniel was provoked beyond reasonable endurance and became sarcastic. In the end, the two of them had a complete falling out. The news drifted up to us that things were not going very well with Elizabeth Ann at the school; but, on Mrs. Marshall asking her about it, the young lady tilted her nose in the air; and, indeed, she told us nothing. Without either of them understanding in the least what was going forward, the schoolmaster was bearing the brunt of a petulant revolt in Betty's mind against the authorities of childhood—a revolt inchoate in the life of every developing girl.

On arriving at school one Wednesday morning, Mr. Nathaniel Carson was rudely shocked by a chalked

message spread out boldly on the school blackboard. This was Betty's note—this is what she wrote:

"I think, Mr. Carson," the other justice interjected, "that you lost your temper very badly or you would not have struck Bob."

The court had apparently decided before it sat that the teacher was the aggressor, and that he should have given me time to get out before attacking me with the cane.

"It was a case of trespass," said one.

"I think it was trespass on the case," said the blacksmith who had read some law book.

So I was let out, and the Allen boys drove me home.

Old Sarah Duncan wept tears of joy. But Betty Marshall said it would teach me to mind my own business.

It was what she deserved," she said, if that was given me.

I was fairly well satisfied in my mind that I had made a fool of myself; and when Mr. Marshall arrived home next day, he made me dead sure of it. He explained to me that it was my duty to go down and apologize to the master for disturbing the school. If I wished it, he said he would go down with me.

"Well," said I, "there's no use taking Bob along. The dog doesn't want to apologize to Mr. Carson. He wants to taste him."

So down we went; and, before the whole class, I told the master I was sorry for what I had done, because I had no right to walk into his school and ask him questions like that. And Mr. Carson made a very suitable speech in reply.

And so far, ruddy little urchin as the 5th lime stood up and snapped his thumb and second finger at the teacher.

"What is it, Samuel?" the teacher inquired.

"Wh-wh-wh-di-di-did you hi-hi-hit Bob?" the child asked him.

Which proves, I fear me, that public questions are not settled on their merits, but by little side issues that have a drag on the hearts of the crowd.

Bob O'New Pitaligo never forgot the indignity he suffered in that schoolhouse, and in the presence of his friends; and he never forgave the schoolmaster, whom he ever afterwards regarded as an evil-smelling and treacherous enemy. For Bob, as you know, came from the Highlands where for centuries men carried the law and the judiciary in the folds of the wicked drab. Sandy Highlanders that sort of thing after the king's laws, and the king's laws, and, if you'll admit, there is no court to settle a dispute between a man and his honest dog. So the curse nursed his grievances, and ever sought private occasion to revenge his personal wrongs. In the result, Mr. Carson felt some fear in the matter; and carried a stout cudgel abroad with him. Those who love deadly are the ones who can hate like sin.

(To Be Continued)

Educational Films

15,000 Films Lying In Vaults Of Hollywood To Be Used For School Purposes

Will H. Hays, czar of the movie industry, has appointed a committee of leading educationists to review the 15,000 sound film "shorts" lying in the vaults of Hollywood motion picture companies and select those of educational value for use in schools.

After reviewing all the "shorts," said Dr. Mark A. May, director of the Institute of Human Relations at Yale University, who is chairman of the committee, the educationists will make recommendations to the Hays office for educational films to be made in the future.

"Of the 15,000 shorts which have been produced," said Dr. May, "it has been estimated that 2,000 of them can probably be used as is, and perhaps another 2,000 could be used after alteration.

"The traveleuses, of which there are not less than 1,000 good ones, and the episodes from American history will undoubtedly be very useful in connection with the teaching of geography, history and civics in the lower grades."

On Trek Through Palestine

Five Young Britons Making Long Trip In Lorry

Five young Britons, four Cambridgebridge students and one a 20-year-old son of a town, left from Southampton, via the Balkans, to visit a lost Byzantine city which has remained buried for nearly 2,000 years.

Their vehicle is a lorry, specially fitted for the difficult route. They will take the route of St. Paul to Palestine.

The trip has a mixed bag of aims: Archaeology as expressed in our visit to the ruins of Esdraelon; then medicine, involving the photographing certain leprosy colonies for the Cambridge Pathological Institute and getting samples of certain forms of river life; and, lastly, architecture—the study of the marvellous Byzantine monastery architecture scattered through the Balkans and Turkey.

"But, why, Mr. Carson," one of the boys asked him, "did you hit Bob?"

Mr. Carson went on with his speech.

Tendency To Stutter

Much More Pronounced In Men Than In Women

Mental nimbleness, which traditionally gives a woman the right to change her mind, protects the fair sex against stutter, says Dr. Robert Milisen, director of Indiana University's speech clinic.

The male, whose mind clings to one idea sometimes too long, finds his tongue twisting its words two to 10 times, more frequently than does that of the female.

The expert explained that stuttering is a neuro-physiological disability about which there is insufficient factual data available to warrant many definite conclusions. There are more than 1,000,000 stutters in the United States, he said, and the preponderance of males has been established.

The masculine tendency to stuttering, said Dr. Milisen, is just one of many comparative deficiencies. More men than women are color blind, he added. Reading and spelling abilities likewise give the feminine sex an edge.

Solving Puzzles

Secretary Of The National Puzzlers' League Is Dead

Lewis C. Trent, a schoolmaster, whose hobby was solving puzzles and who became secretary of the National Puzzlers' League, is dead.

For 40 years Trent devoted his spare time to brain twisters, submitting his stickers and solutions under the name of C. Saw. He came to be known as one of the best "puzzlers" in the United States.

Trent had his own library of 200 dictionaries and completed lists of words from three to 12 letters. He was equally at home with cryptograms, word charades, crosswords, word golf, word scrambles, monograms and bi-syllabic, epigrammatic, enigmatic and phonetic charades." Mrs. Trent was also a "puzzler."

Local News

Mrs. Tom Flynn entertained at tea on Wednesday afternoon.

Miss Agnes Lochrie has been employed by Coleman Cafe.

Douglas Bevan is visiting his parents, Rev. and Mrs. J. H. Bevan, for a week.

Mrs. Wm. Fraser jr., recent bride, was the guest of honor at a shower given at her home on Friday evening.

Mrs. Roy L. Thomas has returned from Vancouver where she has been visiting her daughter Lois for several weeks.

Miss Jean Robert, who has been spending a few days with her sister in Edmonton, has returned home.

George Odell is making rapid headway with the building of a handsome rock wall around his residence.

Miss Muriel Jackson left Monday for Nanaimo, Vancouver Island, for a three months visit with her aunt.

Mr. and Mrs. Wm. McInnes of Bellevue announce the engagement of their daughter, Marie Margaret, to John Kinneair, oldest son of Mr. and Mrs. John Kinneair of Coleman, the marriage to take place Sept. 1.

Mr. and Mrs. Wm. J. Burns were guests of honor at a house-warming and surprise party when the Merry Merry Bunch visited them at their home at the East Kootenay power plant on Friday evening. Bridge was played prize winners being Mrs. Nash and Mrs. Burns. A delicious luncheon was served, after which Mrs. Burns was presented with a small gift.

Correction

A daughter was born to Mr. and Mrs. Robt. Bell on Monday, Aug. 9, and not Aug. 7 as reported last week.

School Board Meeting

A regular meeting of the school board was held Thursday evening, Aug. 19. Present were Chairman Fraser, Trustees Greenhalgh, Fleming and Sharp. Absent, Trustee Hope.

Judge McDonald's report re Hoyle appeal was fully discussed and it was decided that a motion previously passed regarding substitute teachers be rigidly enforced.

Moved by Fleming, seconded Greenhalgh, that Trustees Fraser and Sharp journey to MacLeod and Lethbridge and interview inspectors Bremer and Williams to ask their opinion on the various applicants applying for the vacant position on the high school staff.

Moved by Sharp-Greenhalgh, that Principal Hoyle be notified to be present at the next meeting of Aug. 30.

Permission was given to improve coal chute at Central school and the construction of two cupboards in high school. Typewriters, ordered from Remington Rand Ltd., were to be delivered to the Board by Saturday, Aug. 28.

The secretary was ordered to contact all young men who are not yet paying poll tax.

R. F. Barnes bill was authorized to be paid.

Meeting adjourned at 9:30 p.m.

HOME MARKETS

The best market is always the home market. This is true in the case of agricultural as well as other products. One of the biggest drawbacks to western agriculture is that the home market is not large enough to take the bulk of its output.

The Canadian distillery of Hiram Walker & Sons, at Walkerville, Ontario, is one of the best patrons in the dominion for grains produced on Alberta farms. The purchases of that firm in this province greatly exceed the amount of sales in Alberta. This is the direct opposite of most manufacturers in Eastern Canada.

If Canada did not have any whiskey distilleries all such liquors would have to be imported and the grain needed in the making thereof would be supplied by farmers in other countries. Hiram Walker started his distillery on Canadian soil opposite Detroit, in 1858. There was a chance he would build in Michigan, but adverse legislation then in effect that state prevented him. Now the product of this distillery "Canadian Club" whiskey is one of the best known and most widely distributed in the world and the grain required in the making thereof is supplied by Canadian farmers. Hiram Walker's today are not only one of the largest distillers in the British Empire but they also own the largest distillery in the world.
